

Durasein

An inspired approach
to healthcare

The Project

Welnest Nurses Station
Location Guangzhou, China
Completed 2022

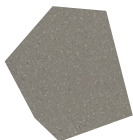

- Healthcare Sector
- Design by D.Lab Team
- Installation by D.Lab Team
- Application: Nurses Station
- Material: DM3018 Concrete and DM1001 Arctic White

The Project

Durasein elevated Welnest's hardworking space into an object of art. Thanks to seamless construction and the ease of fabricating solid surface, this monolithic piece could be constructed in one smooth and sculptural curve. An elliptical design allows nurses to interact with people approaching from any side, and the organic shape and colors create a relaxing atmosphere for patients.

Materials

Forming the exterior of the nurse's station from our Concrete solid surface decor evokes the soothing natural tones of a stone on the beach. The countertop and interior of the station were made from Arctic White, giving the nurses a bright, clean workspace that echoes curves in the surrounding walls and stairway.

Durasein in Healthcare

When it comes to protecting human health and withstanding heavy use, Durasein solid surface material handles both tasks with ease. Its acrylic and mineral composition is naturally resistant to microbes, mold, and mildew, and its seamless surfaces stand up to repeated cleaning with harsh chemicals. It even resists scratches, dents, and staining, so surfaces stay beautiful and welcoming from the first patient to the last.

Discover all the advantages that the Durasein solid surface can bring to healthcare design by visiting us online.
